

# Internet-based Students HeAlth Research Enterprise

<https://neurodegenerationresearch.eu/cohort/internet-based-students-health-research-enterprise/>

## Cohort Acronym

I-Share

## Cohort type

General population-based cohort

## Disease

## Participant type

No diagnosis

## Profile

Recruitment Period 2013-2018

Sample size at start or planned sample size if still recruiting 18,800

Estimated Current Sample Size

Age at Recruitment >18

Gender Male and Female

Abstract

i-Share (Internet-based Students HeAlth Research Enterprise) is a new open and prospective cohort on university students' health. Participants are registered in the first years of study initially with the Universities of Bordeaux and Versailles-Saint-Quentin many many other French universities are now participating. Students are followed up with yearly assessments.

The study sets 2 main types of objectives:

1. Evaluate the frequency and impact of several diseases that may have immediate or short-term consequences on health and well-being (e.g. stress and depression, migraine, sexually transmitted infectious diseases, etc.).
2. Biomedical research objectives on the determinants of diseases. We have set up a cerebral MRI study and biobank on a sample of about 2000 participants including DNA and RNA.

Country France

## Variables Collected

### Brain related measures:

N/A

### Functional rating:

Individual psychological

### Anthropometric:

Blood pressure, Height, Weight

### Physical:

N/A

### Biological samples:

N/A

### Genotyping:

N/A

### Brain imaging:

Magnetic resonance imaging (MRI)

### Brain banking:

N/A

### Lifestyle:

Alcohol, Dietary habits, Physical activity, Smoking

### Socio-economic:

N/A

### Health service utilisation:

N/A
