## Cellular-level Signatures of Pre-Symptomatic Neurodegenerative Disease Progression: Hyperpolarized Magnetic Resonance and Correlated TEM/NanoSIMS Imaging

https://neurodegenerationresearch.eu/survey/cellular-level-signatures-of-pre-symptomatic-neurodegenerative-disease-progression-hyperpolarized-magnetic-resonance-and-correlated-temnanosims-imaging/

## **Principal Investigators**

Andreas Meibom

Institution

**EPFL** 

Contact information of lead PI Country

Switzerland

Title of project or programme

Cellular-level Signatures of Pre-Symptomatic Neurodegenerative Disease Progression: Hyperpolarized Magnetic Resonance and Correlated TEM/NanoSIMS Imaging

**Source of funding information** 

Synapsis Foundation - Alzheimer Research Switzerland ARS

Total sum awarded (Euro)

€ 163,500

Start date of award Total duration of award in years

3

Keywords
Research Abstract
Further information available at:

## Types:

Investments < €500k

## **Member States:**

Switzerland
