Characterization of genetic pathways mediating synapse dysfunction in a Drosophila Alzheimer's disease model

https://neurodegenerationresearch.eu/survey/characterization-of-genetic-pathways-mediating-synapse-dysfunction-in-a-drosophila-alzheimers-disease-model/

Principal Investigators

Simon G. Sprecher

Institution

University of Fribourg

Contact information of lead PI Country

Switzerland

Title of project or programme

Characterization of genetic pathways mediating synapse dysfunction in a Drosophila Alzheimer's disease model

Source of funding information

Synapsis Foundation - Alzheimer Research Switzerland ARS

Total sum awarded (Euro)

€ 218,000

Start date of award Total duration of award in years

3

Keywords
Research Abstract
Further information available at:

Types:

Investments < €500k

Member States:

Switzerland

Diseases:

N/A
