

Deciphering the molecular landscape of Early Onset Parkinson Disease using an integrated approach of exome and transcriptome sequencing

<https://neurodegenerationresearch.eu/survey/deciphering-the-molecular-landscape-of-early-onset-parkinson-disease-using-an-integrated-approach-of-exome-and-transcriptome-sequencing/>

Name of Fellow

Wouter De Coster

Institution

Funder

Contact information of fellow

Country

Belgium

Title of project/programme

Deciphering the molecular landscape of Early Onset Parkinson Disease using an integrated approach of exome and transcriptome sequencing

Source of funding information

Total sum awarded (Euro)

€ 149,341

Start date of award

01/01/15

Total duration of award in years

4.0

The project/programme is most relevant to:

Parkinson's disease & PD-related disorders

Keywords

Parkinson's disease | exome and transcriptome sequencing | genes and pathways

Research Abstract

This project represents a research agreement between the UA and on the onther hand IWT. UA

provides IWT research results mentioned in the title of the project under the conditions as stipulated in this contract.

Types:

Fellowships

Member States:

Belgium

Diseases:

Parkinson's disease & PD-related disorders

Years:

2016
