

Development of a composite imaging/ gait-behaviour biomarker for early detection of cognitive impairment in ageing

<https://neurodegenerationresearch.eu/survey/development-of-a-composite-imaging-gait-behaviour-biomarker-for-early-detection-of-cognitive-impairment-in-ageing/>

Principal Investigators

Bogdan Draganski

Institution

CHUV

Contact information of lead PI

Country

Switzerland

Title of project or programme

Development of a composite imaging/ gait-behaviour biomarker for early detection of cognitive impairment in ageing

Source of funding information

Synapsis Foundation - Alzheimer Research Switzerland ARS

Total sum awarded (Euro)

€ 163,500

Start date of award

Total duration of award in years

3

Keywords

Research Abstract
