

HUNT Data center

<https://neurodegenerationresearch.eu/survey/hunt-data-center/>

Name of Resource (to include any acronym)

HUNT databank

Question

Related

Name of Resource

HUNT Data center

Name of Principal Investigator - Title

Prof

Name of Principal Investigator - First Name

Arnulf

Name of Principal Investigator - Last Name

Langhammer

Address of institution -Institution

HUNT Research Center, NTNU (Norwegian University of Science and Technology)

Address of institution - Street address

Forskningsvegen 2

Address of institution - City

Levanger

Address of institution - Postcode

7600

Country

Norway

Website

arnulf.langhammer@ntnu.no

Purpose of resource

Public funding source for NTNU, but also for the wider research community nationally and internationally.

Q1. Is the resource?

General (e.g. DNA sequence, proteomic data)|Other please specify

Please Specify

There is a special resource for genetic data, HUNT Data Center and Cloud managed by prof Kristian Hveem (kristian.hveem@ntnu.no)

Q2. Does the resource specifically provide for any of the neurodegenerative diseases/disease subtypes specified below?

Alzheimer's disease and other dementias|Parkinson's disease|Neurodegenerative disease in general

Q3a. Is the resource accessible to the research community?

Yes

Q3b. If yes, what procedures and rules apply for access?

Apply to PI or coordinator at resource|Access independent of collaboration with PI|Access Committee mechanism|Local/regional access|National access|International access|Access to industry|Access for pilot studies permitted|Charge for access|Access through unique identifier

Q4a. What type of data is provided?

Genotype data|Phenotype data|Metabolomics|Cognitive/behavioural data

Please describe

GWAS-data from 72 000 participants, sequencing data from 2000|Biochemical measurements on the entire or selected parts of the collection such as lipids, glucose, CRP, kreatinin, liver enzymes, vitamins, hormones|Will be available from approx 25 000 within the next 6 months|Will be available from HUNT4 (Sept 2017-Febr 2019)

Q4b. More generally are there other data available through the resource that you think may be useful to researchers in the context of the above conditions?

Cognitive Function

Please describe

Will be available from HUNT4 (Sept 2017-Feb 2019)

Q5a. Is maintenance of this resource dependent on continued funding?

Yes

Q5b. If yes, when does the current funding period end?

N/A

Q5c. Are there plans to secure further funding beyond this period?

Yes

If YES please specify for how long in years

>20

Q5d. What is the expected lifespan of the resource (in years)?

The funding is both on governmental and University budgets and there are no plans for terminating this. Other, project based resources requires additional funding. There are no other plans than keeping this resource "for ever".

Q5e. Are there other plans affecting future use that it may be useful to know?

Types:

Bio/Neuroinformatic Resources

Member States:

Norway

Diseases:

Alzheimer's disease & other dementias, Neurodegenerative disease in general, Parkinson's disease & PD-related disorders

Years:

2016

Database Categories:

N/A

Database Tags:
