Project/infrastructure description

Methodological developments including the physics of Magnetic Resonance Imaging (MRI), the optimization of data acquisition and processing protocols for Positron Emission Tomography (PET), development of tracers for PET Imaging and for multimodality PET - MRI - optical imaging and image processing and development of associated software architectures. Preclinical and clinical research mostly in the fields of neuroscience and oncology

Date funding committed

01/01/2013

Date infrastructure operational

01/01/2013

Total capital cost (Euros)

€ 25,500,000

Does the 'Total Capital Cost' include other associated costs?

Current infrastructure status

Operational
