Title of project/programme

Improving access to UK dementia services for the South Asian minority ethnic population: development and pilot of an intervention.

Source of funding information

NIHR

Total sum awarded (Euro)

€ 409,105

Start date of award

01/01/13

Total duration of award in years

4.0

The project/programme is most relevant to:

Alzheimer's disease & other dementias

Keywords

Dementia

Research Abstract

Early diagnosis of dementia is a National Dementia Strategy priority. It can improve outcomes for people with dementia and carers by enabling treatment, support and the opportunity to plan for the future. People from minority ethnic groups access dementia services later than the White UK population and previous research has shown this is likely to be due to cultural differences. I propose carrying out further qualitative research to explore what kind of intervention South Asian community members would find helpful in encouraging earlier help-seeking for dementia. I would then develop and test the intervention in a pilot randomised controlled trial
