

In vivo study of the metabotropic glutamate receptor type 5 (mGluR5) in relation to adenosine signaling and neuroinflammation in experimental Parkinson's disease

<https://neurodegenerationresearch.eu/survey/in-vivo-study-of-the-metabotropic-glutamate-receptor-type-5-mglur5-in-relation-to-adenosine-signaling-and-neuroinflammation-in-experimental-parkinson%20s-disease/>

Name of Fellow

Melissa Crabbé

Institution

Funder

Contact information of fellow

Country

Belgium

Title of project/programme

In vivo study of the metabotropic glutamate receptor type 5 (mGluR5) in relation to adenosine signaling and neuroinflammation in experimental Parkinson's disease

Source of funding information

Total sum awarded (Euro)

€ 150,669

Start date of award

01/01/16

Total duration of award in years

4.0

The project/programme is most relevant to:

Parkinson's disease & PD-related disorders

Keywords

metabotropic glutamate receptor type 5 | Parkinson's disease | glutamatergic adenosinergic pathway | glutamatergic neuroinflammatory pathway | AS3T rAAV2/7 alpha-synuclein model

Research Abstract

Types:

Fellowships

Member States:

Belgium

Diseases:

Parkinson's disease & PD-related disorders

Years:

2016

Database Categories:

N/A
