

# Metal complexes for the treatment of age-related diseases of the brain

<https://neurodegenerationresearch.eu/survey/metal-complexes-for-the-treatment-of-age-related-diseases-of-the-brain/>

## **Name of Fellow**

Dr Jeffrey Liddell

## **Institution**

## **Funder**

NHMRC

## **Contact information of fellow**

## **Country**

Australia

## **Title of project/programme**

Metal complexes for the treatment of age-related diseases of the brain

## **Source of funding information**

NHMRC

## **Total sum awarded (Euro)**

€ 209,541

## **Start date of award**

01/01/13

## **Total duration of award in years**

5.0

## **The project/programme is most relevant to:**

Alzheimer's disease & other dementias

## **Keywords**

neurodegenerative disorders | novel therapeutic agents | neuroprotection | copper | neuron-glia interactions

## **Research Abstract**

Dr Liddell is a neuroscientist investigating potential therapeutic agents for the treatment of diseases of affecting the brain such as Alzheimer's disease and Parkinson's disease. He is examining a class of metal-based compounds that are showing strong potential for disease treatment, and is investigating how these compounds work. The findings will be used to further develop and improve these therapeutic agents, and may help understand the underlying causes of these diseases.

**Types:**

Fellowships

**Member States:**

Australia

**Diseases:**

Alzheimer's disease & other dementias

**Years:**

2016

**Database Categories:**

N/A

**Database Tags:**
