Title of project or programme

Neurodegeneration and Brain Diseases: A new instrumental approach of analysis and development of pharmaceutical formulations

Source of funding information

The Executive Agency for Higher Education, Research, Development and Innovation Funding (UEFISCDI)

Total sum awarded (Euro)

€ 108,900

Start date of award

10/01/2015

Total duration of award in years

2

Keywords

Research Abstract

This project is a scientific research project funded by UEFISCDI, attempting to obtain valuable data regarding the stability and behavior of bioactive compounds used in therapies of BD. As well, by the preparation and characterization of newly obtained salts, a new theme and research direction will be opened, by the evaluation of their in vivo behavior in terms of bioavailability.

The development of new salts with increased stability will lead to the preparation of highly active products. The project is carried out within the University of Medicine and Pharmacy “Victor Babes” Timisoara, Faculty of Pharmacy. The duration of the project is two years (2015-2017).
