

# New ocular biomarkers for early detection of Alzheimer's disease

<https://neurodegenerationresearch.eu/survey/new-ocular-biomarkers-for-early-detection-of-alzheimers-disease/>

## Principal Investigators

Jean-Francois Démonet

## Institution

CHUV

## Contact information of lead PI

### Country

Switzerland

## Title of project or programme

New ocular biomarkers for early detection of Alzheimer's disease

## Source of funding information

Synopsis Foundation - Alzheimer Research Switzerland ARS

## Total sum awarded (Euro)

€ 327,000

## Start date of award

## Total duration of award in years

3

## Keywords

## Research Abstract

## Further information available at:

## Types:

Investments < €500k

## Member States:

Switzerland

## Diseases:

N/A

## Years:

2016

## Database Categories:
