Name of Fellow

A/Pr Kevin Barnham

Institution

Funder

NHMRC

Contact information of fellow

Country

Australia

Title of project/programme

New therapies and diagnostic approaches for Alzheimer's and Parkinson's diseases

Source of funding information

NHMRC

Total sum awarded (Euro)

€ 538,751

Start date of award

01/01/11

Total duration of award in years

6.0

The project/programme is most relevant to:

Alzheimer's disease & other dementias

Keywords

neurodegeneration | multidisciplinary | chemistry | alzheimer disease | parkinson disease

Research Abstract

Diseases of the brain such as Alzheimer's and Parkinson's disease cause enormous socio-

economic harm to Australia. They are a major cause of disability and the burden associated with mental illness is predicted to grow by almost 50% over the coming decade. Therefore there is an urgent need to develop new approaches to identify and treat these diseases. This Fellowship will be dedicated to creating new diagnostic methods and treatments for these diseases

Types:

Fellowships
