

Non-Alzheimer's disease degenerative dementias: Identifying prodromal genetic/familial phenotypes, modifying factors, and protein variations involved in progression

<https://neurodegenerationresearch.eu/survey/non-alzheimer%c2%92s-disease-degenerative-dementias-identifying-prodromal-geneticfamilial-phenotypes-modifying-factors-and-protein-variations-involved-in-progression/>

Principal Investigators

Prof Glenda Halliday

Institution

University of New South Wales

Contact information of lead PI

Country

Australia

Title of project or programme

Non-Alzheimer's disease degenerative dementias: Identifying prodromal genetic/familial phenotypes, modifying factors, and protein variations involved in progression

Source of funding information

National Health and Medical Research Council

Total sum awarded (Euro)

€ 4,455,538

Start date of award

01/01/2015

Total duration of award in years

6.0

The project/programme is most relevant to:

Alzheimer's disease & other dementias

Keywords

Research Abstract

Lay Summary

Further information available at:

Types:

Investments > €500k

Member States:

Australia

Diseases:

Alzheimer's disease & other dementias

Years:

2016

Database Categories:

N/A
