

# Pharmacological studies of new benzisoxazoloethylpyrrolidine derivatives as multifunctional ligands with potential prokaryotic and antipsychotic properties (in vivo, animal models)

<https://neurodegenerationresearch.eu/survey/pharmacological-studies-of-new-benzisoxazoloethylpyrrolidine-derivatives-as-multifunctional-ligands-with-potential-prokaryotic-and-antipsychotic-properties-in-vivo-animal-models/>

## Principal Investigators

Monika Marcinkowska

## Institution

Jagiellonian University Medical College

## Contact information of lead PI

### Country

Poland

## Title of project or programme

Pharmacological studies of new benzisoxazoloethylpyrrolidine derivatives as multifunctional ligands with potential prokaryotic and antipsychotic properties (in vivo, animal models)

## Source of funding information

National Science Centre

## Total sum awarded (Euro)

€ 136,076

## Start date of award

14/07/2015

## Total duration of award in years

3

## Keywords

Research Abstract
